Coimbatore, Tamil Nadu, India

SUMMARY

Motivated B.Tech Information Technology graduate with hands-on experience in designing, developing, and enhancing custom software components across web-based systems. Skilled in full-stack development, REST API integration, and performance optimization using modern frameworks. Experienced in Agile development environments, collaborative problem-solving, and supporting project delivery cycles. Committed to building scalable, high-performing software solutions aligned with business and program objectives.

INTERNSHIP EXPERIENCE

Full Stack Web Development Intern, Pantech eLearning Pvt. Ltd. *Jun 2025 – Jul 2025*

Designed and developed responsive software components using HTML5, CSS3, and JavaScript. Collaborated with backend teams to integrate RESTful services and enhance system functionality. Contributed to Agile sprint activities including requirement discussions and issue resolution. Performed debugging, testing, and performance tuning to ensure scalable and high-performing applications.

Python Programming Intern, Codsoft *Dec 2024 – Jan 2025*

Developed modular Python applications and automation scripts supporting business logic implementation. Applied object-oriented programming principles and structured debugging practices. Participated in problem-solving discussions and assisted in improving application reliability and efficiency.

Web Development Intern, CognoRise Infotech *May 2024 – Jun 2024*

Built and enhanced responsive web applications aligned with client requirements. Assisted in testing, deployment, and documentation of software modules. Collaborated with cross-functional team members to ensure timely project delivery and quality standards.

PROJECTS

1.E-Store Book Management System – React.js, MySQL (Full CRUD)

Designed and implemented a custom software solution supporting full CRUD operations. Developed scalable frontend components and integrated backend services to manage structured data efficiently. Ensured optimized database interactions and smooth user workflows.

2.Climate Analytics Dashboard – React.js, OpenWeather API

Built a real-time analytics system integrating external APIs to deliver data-driven insights. Designed reusable UI components and enhanced system responsiveness through optimized API handling.

3.Real-Time Chat Application – Laravel, React.js

Developed a secure communication platform with user authentication and real-time messaging. Enhanced backend services and frontend components to improve system reliability and performance.

4.Smart Curtain Control System – ESP32, IoT

Designed an IoT-based automation system integrating hardware components with software logic. Supported scheduling, monitoring, and remote control functionalities.

5.AI Smart Glasses for Visually Impaired – Computer Vision

Conceptualized an assistive technology solution integrating computer vision and voice-based feedback to enhance accessibility support.

EDUCATION

2022 – 2026	B.Tech in Information Technology , Adithya Institute of Technology	CGPA: 8.216
2021 – 2022	HSC , Sri Ragavendra Higher Secondary School	83%
2019 – 2020	SSLC , St. John De Britto Girls High School	77%

SKILLS

Programming Languages	Python, Java
Frontend Technologies	HTML5, CSS3, JavaScript (ES6+), React.js
Backend Technologies	Node.js, PHP, Laravel
Databases	MySQL, MongoDB
Tools	Git, GitHub, VS Code, Postman
Soft Skills	Analytical Thinking, Collaboration, Communication, Problem-Solving

TECHNICAL COMPETENCIES

Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Agile Methodology, RESTful Services, Debugging, Code Enhancement, Version Control, Program Support Activities

PUBLICATIONS & ACHIEVEMENTS

1. Presented research paper "*Smart Curtain Control System*" at ICAIT 2025.
2. Published research chapter in JSER – Multidisciplinary Research in Innovation & Technology (ISBN: 978-81-986573-4-3), March 2025.
3. Participated in Web Development Hackathon by CognoRise Infotech, June 2024.
